Boundary conditions for the outer radius ($\rho = L_{\rho}$)

Boundary conditions for the stagnation point (z = 0)

$$\partial_{\rho} n = 0$$

$$\partial_{\rho} u_{e,\parallel} = 0$$

$$\partial_{\rho} u_{i,\parallel} = 0$$

$$\partial_{\rho} \Omega = 0$$

$$\phi = 0$$

Boundary conditions for the sheath entrance $(z = L_z)$
